

Vaulting – Securely Store Your Customers' Data

Store data without the need for customers to re-enter their information.

- + Merchants can choose to store credit card, customer details, billing address, and shipping address in the Vault when creating a transaction.
 - we support unlimited custom fields at the customer and transaction levels.
- + Enable repeat customers to easily check out with a single touch.
- + Minimal-hassle PCI compliance - no raw credit card data passes through merchants' servers.

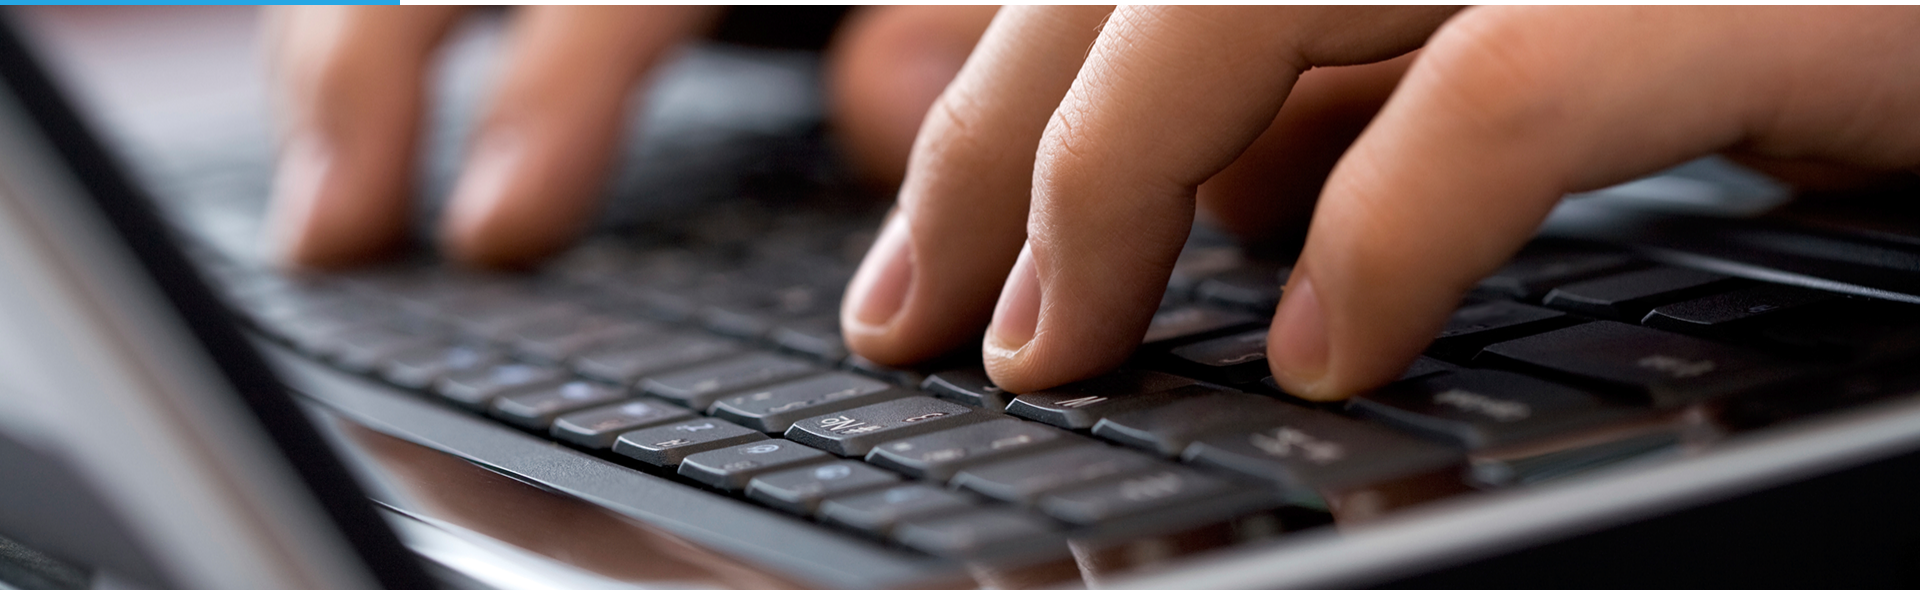

Keep your customers' information up to date

Account Updater within the vault.

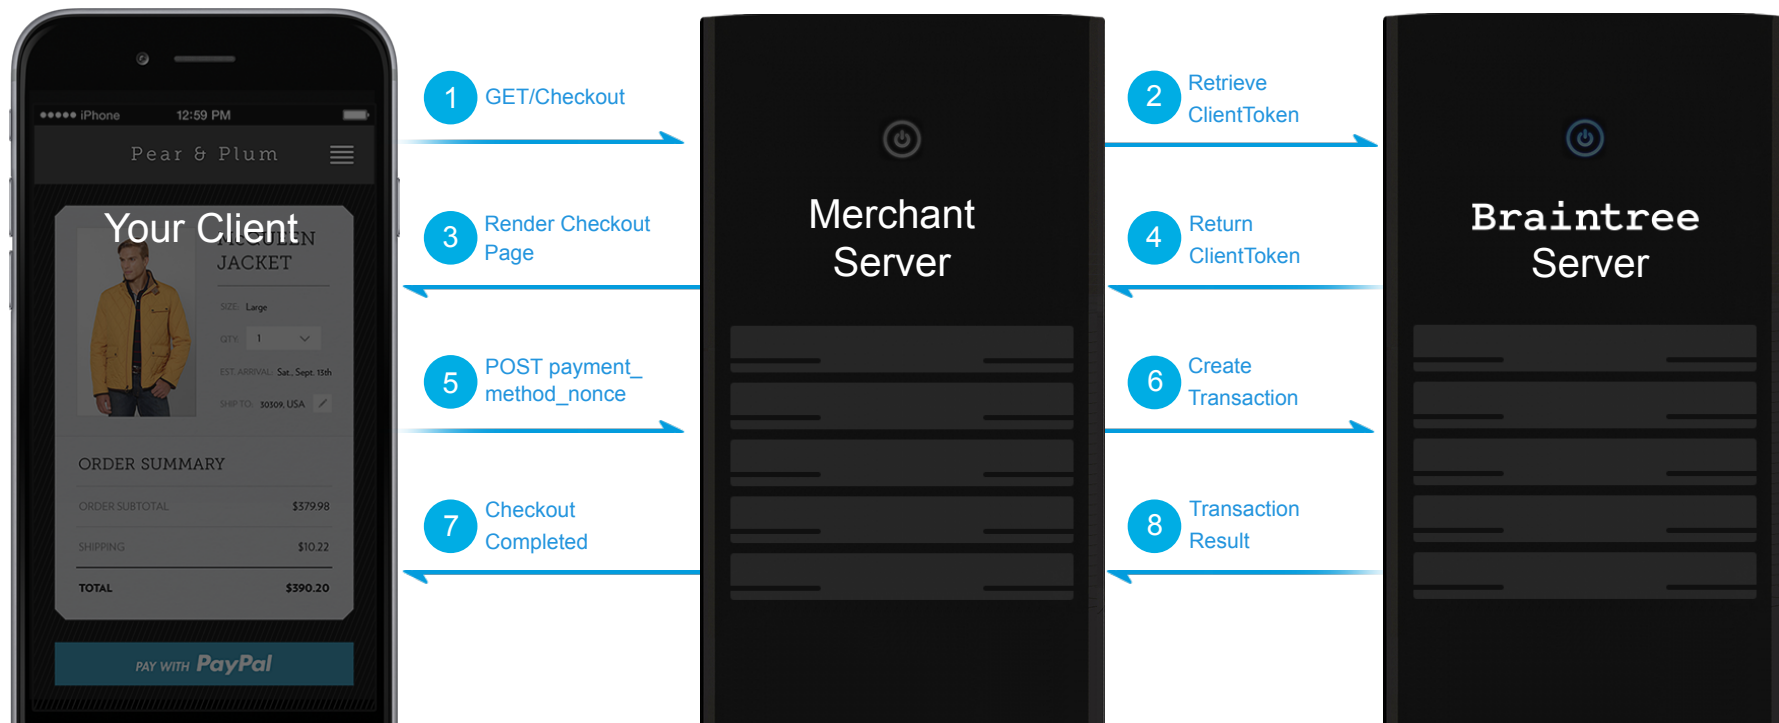

- + Keep your customers' credit cards current, so you don't have to worry about missing a payment or cart abandonment*.
- + Program is run on the back end, so you can continue focusing on improving your business and satisfying your customers.

* Available only for cards issued in the US by participating banks.

Addressing PCI Compliance

- + No raw credit card data passes through the merchant's server. All sensitive card data is encrypted and stored safely (in the vault).
- + Reduces PCI compliance scope.

Braintree

Competitive Interchange & Pricing Options

We provide transparent & easy to understand pricing.

- + No long-term contracts or setup fees.
- + Charged upon settled transactions only.
- + No fees on authorization, voids or storing of cards.
